Art Unit: 3662

1. The Specification is objected to under 37 CFR 1.77(b) and 37 CFR 1.77(c) in that the Specification is not divided into the sections set forth in 37 CFR 1.77(b) using the headings set forth in 37 CFR 1.77(c). Correction is hereby **required**.

2. Claims 1-20 and 31-32 are allowable over the prior art of record.

3. Claims 21-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Throughout claims 21-30, the uses of the word "logic" are indefinite and unclear in context. For example, "logic" can refer to written matter, to Boolean expressions in software, or to logic gates in IC chips. Please see 37 CFR 1.75(d)(1).

Dependent claims 22-30 are unclear in that they depend from unclear independent claim 21.

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 21-30 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Insofar as claims 21-30 may be interpreted, they are directed to claiming nonfunctional material (i.e., "logic") on a computer-readable medium. According to the Guidelines set forth in MPEP 2106, nonfunctional material residing on a computer-

readable medium is not statutory subject matter under 35 USC 101. In order to be statutory, the material residing on the computer-readable medium must be functional (i.e, capable of directing a computer to execute certain tasks). Please see section IV.B.1. of the Guidelines in MPEP 2106.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The examiner-cited prior art herewith is of general interest for showing returned-wave imaging systems and methods that make mention of an "image matrix," as in Applicants' invention.

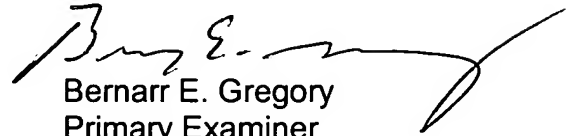

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernarr E. Gregory whose telephone number is (703) 306-5765. The examiner can normally be reached on weekdays from 7:30 AM to 4:00 PM.
